Urdu Native

INTERESTS

Software Engineering · Web Development · UI/UX Design · Problem Solving · Emerging Technologies · Freelancing · Entrepreneurship

PROFESSIONAL SUMMARY

Ambitious Full Stack Web Developer with hands-on experience building responsive, user-focused websites using HTML5, CSS3, JavaScript, PHP, Laravel, and MySQL. Skilled at translating client requirements into clean, scalable code across the full development lifecycle, from UI design and frontend development to backend logic, database integration, and deployment. Successfully delivered a paid client project end-to-end, sharpening both technical execution and professional client communication. Founder of JDN Host, a web hosting and domain services venture reflecting an entrepreneurial mindset and practical grasp of deployment and hosting infrastructure. A fast learner who solves problems independently and within a team, with a genuine passion for modern UI development and building scalable web applications. Eager to bring energy, adaptability, and a strong work ethic to an internship, entry-level role, remote opportunity, or freelance project, while growing toward a long-term career in software engineering.

EXPERIENCE

Freelance Web Developer | *Paid Client Project*

- Consulted directly with the client to gather requirements and translate their vision into a fully functional, responsive website.
- Designed and built the complete frontend using HTML5, CSS3, JavaScript, and Bootstrap for a clean, modern, responsive experience.
- Developed backend logic with PHP and Laravel (MVC architecture), integrating a MySQL database for dynamic content.
- Tested, debugged, and deployed the application, from domain setup to server configuration and go-live.
- Maintained clear client communication throughout the project and provided post-launch maintenance and support.

ENTREPRENEURSHIP

Owner / Founder | *JDN Host · jdnhost.com*

- Founded and operate JDN Host, a web hosting and domain services business supporting individuals and small businesses in getting online.
- Provide domain registration, web hosting, and website deployment, including DNS configuration and cPanel management.
- Manage the full client journey from onboarding to technical support, building practical experience in service delivery and infrastructure management.

PROJECTS

Professional Business Website | *Projects: edenwhitepalace.com*

- Built a complete, responsive business website using HTML5, CSS3, JavaScript, PHP, Laravel, and MySQL.
- Implemented a modern, user-friendly UI with optimized performance and responsive design across desktop and mobile.

Hosting & Deployment Services | *JDN Host*

- Manage end-to-end website hosting and deployment operations, including domain configuration, DNS setup, and cPanel administration.
- Support clients through the full deployment process to ensure smooth, reliable website launches.
